

# COUNTYWIDE ROAD RESURFACING FY 2017-18 PROJECTS

## Project Description and Purpose

The County of San Diego (County) Department of Public Works (DPW) maintains nearly 2,000 centerline miles of roads, or 4,000 lane miles, in unincorporated San Diego county.

On April 28, 2017, the Governor approved Senate Bill 1 (SB 1), the Road and Repair Accountability Act of 2017 to address the statewide funding gap for road maintenance. On May 2, 2017, the County Board of Supervisors set a goal and approved the use of these new funds to improve the overall condition of the County's maintained road system over the next five years. Fiscal Year 2017-18 is the first year of this increased funding and DPW has developed a list of road resurfacing locations totaling 195 centerline miles. The list of roads was developed based on operational needs, resident and community planning group input, and DPW's pavement management system software needs assessment. Resurfacing will improve the overall condition of the roads and will protect roads from deterioration and costly future repairs.

## Project Funding

The estimated construction cost of the projects is \$42 million. Funding sources include a SDG&E Franchise Fees, Road Fund Balance, Road Fund Reserves, TransNet, and Highway Users Tax Account.

## Construction Schedule

Advertise & Award Contract	Spring 2018
Construction Start	Summer 2018
Construction Complete	Winter 2018/19

## Project Contact Information

Mark Perrett, CIP Program Manager

## Project Benefits

The Countywide Road Resurfacing Projects provide the following benefits:

- Improves the overall condition of the road
- Provides safer roads for drivers and cyclists
- Protects roads from deterioration
- Helps reduce costly future repairs
- Decreases operating costs for roadway users
- Provides jobs for the local economy

## Environmental Documents

This project is categorically exempt in accordance with Section 15301 of the CEQA Guidelines. For more information, please contact: Tom Duffy, Environmental Project Manager
